With the news of the German Society für Galvano- und Oberflächentechnik, the Austrian Society für Oberflächentechnik and the Swiss associations SGO and Swissgalvanic.

Target audience

Companies and specialists in the metal processing industry dealing with electroplating and surface treatment of metals and plastics, as well as companies in the supplier industry. The readers are decision-makers about technical and organisational processes and are often directly involved in business decisions, as 42 % of the readers are members of the management (according to reader survey 9/2009).
