G. A. Lausmann

Chromium Plating

1st edition

EUGEN G.
LEUZE
VERLAG

105 JAHRE 1902 – 2007

BAD SAULGAU
GERMANY

Table of contents

1	History	11
2	The electrolytic deposition of chromium.....	14
2.1	Principles of deposition.....	14
2.1.1	Deposition by reduction in steps	14
2.1.2	Deposition by direct reduction of chromate	15
2.1.3	Anodic reactions.....	16
2.1.4	Reaction of chromium at the electrodes in aqueous solutions.....	17
2.2	Basic constituents of chromium solutions.....	21
2.2.1	Chromic acid	21
2.2.2	Catalysts	22
2.2.3	The practical application of fluor surfactants in chromium plating solution	22
2.2.4	Impurities	30
2.3	Chromium solutions based on chromic acid	31
2.3.1	Fink's solution	31
2.3.2	Self-regulated sulphate solutions	31
2.3.3	Mixed catalysts.....	37
2.3.3.1	Installation: Operation and control of the CF. 500 crack-free chromium plating solution.....	39
2.3.4	Etchfree high speed solutions.....	45
2.3.4.1	Process of chromium electroplating with extremely high efficiency	47
2.3.5	Duralloy.....	51
2.3.6	Black chromium	58
2.3.7	Decorative chromium	60
2.3.8	Tetrachromium	62
2.3.9	Chromium coatings by co-deposition of alloying metals.....	62
2.3.9.1	Chromium plating at high current densities using electrolytes with an addition of Na_2MoO_4	69
2.3.10	Hard chromium plating under reduced pressure	78

2.4	Chromium(III)solutions	81
2.4.1	Ion exchange for trivalent chromium plating baths	82
2.4.2	Cr(III)processes.....	83
2.4.3	Functional trivalent chromium plating	89
2.5	Function of constituents in chromium solutions	97
2.5.1	Aqueous solutions with specific additions	97
2.5.1.1	Solutions with inorganic addition agents	98
2.5.1.2	Solutions with organic addition agents	127
2.6	Properties of solutions and deposits.....	128
2.6.1	Current efficiency.....	128
2.6.2	Throwing power and metal coverage.....	128
2.6.3	Conductivity	130
2.6.4	Properties of chromium deposits.....	131
2.6.5	Amorphous chromium layers	133
2.6.6	Corrosion resistance of hard chromium deposits	133
2.6.7	Sources of nodules and pits in hard chromium electrodeposits.....	135
3	Decorative chromium plating.....	139
3.1	Decorative chromium plating at the state of the art	139
3.2	Duplex- and tri-chromium.....	144
3.3	Porous chromium and microcracks by nickel solutions	147
3.4	Function of corrosion protection by micro pores and accelerated corrosion test by the Fuhrmann test	152
4	The hard chromium plating	158
4.1	Choice of the basic material and its surface treatment.....	158
4.2	Process sequences	162
4.2.1	Heat treatment of the components before and after the chromium plating	162
4.2.2	Pretreatment before plating, grinding and finishing before and after plating.....	163
4.2.3	Pretreatment before plating	166
4.2.4	Fixtures, shielding, auxiliary anodes.....	171
4.2.5	Masking and stop-off lacquers	175
4.2.6	Reverse etching	177
4.2.7	Formation of cracks in hard chromium deposits	179
4.2.8	Cracked, porous and dispersion deposits.....	185
4.3	Application of hard chromium deposits.....	187

4.3.1	Shock absorbers, hydraulic pistons	187
4.3.1.1	High speed deposition with modern equipment technology....	196
4.3.1.2	Ultra high speed deposition on shock absorber pistons	204
4.3.2	Replating of diesel liners.....	210
4.3.3	Printing rolls.....	213
4.3.4	Chromium on grey cast iron.....	219
4.3.4.1	Graphite cast iron.....	221
4.3.4.2	Vertical rotation system for cylindrical parts	221
4.3.5	Chromium on stainless steel.....	222
4.3.6	Chromium on aluminium cylinders.....	223
4.3.7	Structured chromium.....	225
4.3.8	Individual applications	225
4.3.8.1	Hardened parts	225
4.3.8.2	Plating of grooved rolls	226
4.3.8.3	Dies and moulds.....	226
4.3.8.4	Nitrated parts.....	226
4.3.8.5	Crack-free chromium for the production of copper foils	227
5	Stripping of chromium deposits	228
6	Troubleshooting.....	233
6.1	Decorative and industrial chromium plating	233
6.2	Eliminating substrate defects	244
7	Equipment and auxiliary items	245
7.1	Barrel plating of chromium.....	245
7.2	Tampon or brush plating	247
7.3	Influence of rectifier ripple.....	248
7.4	Exhaust system.....	253
7.5	Resistance of materials in chromium solutions.....	256
7.6	Anodes	257
7.7	Safe handling of chromium products.....	263
8	Waste water treatment and recycling.....	267
8.1	Limits	267
8.2	Treatment of Cr(VI) effluent	268
8.2.1	Chromium plating processes without waste water	268
8.2.2	Destruction of hexavalent chromium compounds.....	272
8.2.3	Treatment of chromates with sulphur dioxide and sulphites	273
8.2.4	Chromate reduction with iron(II)compounds.....	277
8.2.5	Cathodic reduction of chromates.....	278
8.2.6	Chromate treatment by precipitation of insoluble chromates.....	280

8.2.7	Sedimentation.....	280
8.2.8	Precipitation of chromium.....	281
8.2.9	Precipitation pH	282
8.2.10	Composition of precipitation.....	284
8.2.11	Solubilities and solubility products	285
8.3	Methods to safe water	287
8.3.1	Cascades.....	287
8.3.2	Evaporation of water out of plating tanks	299
8.4	Recycling of chromic acid.....	300
8.4.1	Recycling by ion exchangers.....	300
8.5	Online-regeneration of chromium electrolytes with membrane electrolyzers.....	302
9	Analytical control.....	308
9.1	Analytical methods.....	308
9.1.1	Determination of CrO_3 in chromium solution.....	308
9.1.2	Determination of Cr_2O_3 in the chromium solution.....	309
9.1.3	Determination of sulphate concentration in chromium solution.....	310
9.1.4	Determination of zinc in the chromium solution.....	311
9.1.5	Determination of aluminium in the chromium solution.....	312
9.1.6	Determination of sodium in the chromium solution	313
9.1.7	Determination of chloride in the chromium solution	314
9.1.8	Test of Fumex FT/R in the chromium solution	315
9.1.9	Determination of catalyst concentration in the chromium solution	316
9.1.10	Determination of silicofluoride	318
9.2	Thickness control	319
9.3	Methods to control properties of solutions.....	320
10	Tables	321
10.1	Properties of chromium.....	321
10.2	Current efficiencies and deposition rates	322
10.3	Component parts in percent by weight of salts commonly used in electroplating.....	324
10.4	Specific gravity of chromium solutions	325
10.5	Table of conversion factors.....	329
10.6	Temperature conversion tables	332
	References.....	334
	Index.....	345
	List of Advertisers	349
